

EHHD provides oversight of all septic repair and installation plans.

- [Application for Plan Review](#)- needed when submitting plans for review of new septic system designs, repair system plans, alterations and septic tank replacements
- [B100a Application](#)- for building conversion, change of use, building addition, accessory structure and lot line change
- [Septic System Application](#)- Application for Permit to Construct or Repair a Sewage Disposal System
- [Septic System As-Built Plan](#) - needed when permitted installation is completed and approved. An accurate as-built helps homeowners find the septic tank and leaching field components for easier maintenance and care of the system
