The produce of the week is...

Turnips

What vegetable is eaten for both its roots and greens?

TURNIPS!

- ◆ Turnips come in all shapes, sizes and colors.
- ◆ Select smooth surfaced roots that are firm and heavy with some root hairs at the bottom.
- ◆ In general, the smaller the turnip, the sweeter the taste.
- ◆ To store, cut the greens and bag them separately from the root; place in the crisper section of the refrigerator for up to a week.

Did you know?

- ◆ Turnips are available year round with a peak in the fall and winter months.
- ◆ Overcooking turnips will diminish their sweetness.
- ◆ Turnip greens are often compared to mustard greens.

Count it out!

Keep track of the fruits and veggies that you eat each day by coloring in a different piece of triangle every time you have a fruit or veggie. Try to eat a rainbow of colors and have at least 5 servings of fruits or veggies each day.
